

**Editor's Corner**

So, new studies have found that men's baldness IS NOT inherited from the mother's side. It is rather determined by a recently discovered gene that can be passed on from either the father's or the mother's side. These finally explains the legions of men whose pates look like their dad's. I still think that God made a few perfect heads and then covered the rest with hair... On a less serious note, the month of October, while still going on, has already provided an unusual number of outstanding riding adventures for some of us. Malabar Farms, AMA Hall Of Fame Show and the Algonquin Mill Festival in Carrollton , just to name a few. If you missed these, you really missed out. My hopes are still up, that we can get a few more days of riding in before we have to talk about how to best "winterrize" our bikes. You know, my theory is, with riding not possible much before June/July and lasting well into late October, that the weather is moving its way around the calendar and one of these years we will be able to ride to the Christmas party!

Another Bike Show award for Richard Horvat! It may be a small bike, but it is winning big! Dick took his R26 to the AMA Museum Hall OF Fame Show on Saturday, October 11 and came home with another prize. Dick will have to add a room to his house to hold all the trophies.

This is the award the club brought back from the Rally In The Poconos in September. Most Club Members in Attendance
