Assignment Page: assignment.html (5 pts)
Due by the Sunday of Week 2, 12:00 midnight

After reading the first two units, you should create a web page named assignment.html and upload it to your Zipspace. After uploading your assignment.html page, you will need to post the correct URL to your assignment.html page in Topic 2 Weekly Discussion Form. The purpose of this web page is to have a central location for submission and review of assignments. In this assignment you will only create the basic template or structure for the web page, but the contents will change as the semester progresses.

If you are not quite sure how to use NotePad (PC) or TextWrangler (Mac) to create your first web page, please check out the guides for NotePad and TextWrangler in Content/Course Content/Week1&2 Folder.

I. Content of the Assignment

This assignment.html page should have at least the following. Click http://gozips.uakron.edu/~tsai1/hypermedia/assignment.html to see a basic example.

- the title in the title bar (different from a heading) should be "[Your name goes here]'s Assignment Page"
- a paragraph about yourself or an interesting/funny quote (at least two or three sentences)
- a table to contain your picture or your introduction
- a list to show your future assignments
- text for links to the units and assignments due during the semester (see the example)
- anything else you want -- please make your page unique

II. How to Submit Your Assignments Page

After finishing your assignment.html page, you will need to:

- upload your assignment.html page to your Zipspace, and
- type your URL of your assignment.html page in the DB forum: “Submission DB: Assignment Page”
III. Evaluation

Your assignments.html page will be graded based on the following criteria.

<table>
